

PROOFPOINT FOR CONTINUOUS DIAGNOSTICS AND MITIGATION

SECURE YOUR VITAL COMMUNICATIONS CHANNELS

KEY BENEFITS

- Meet each phase of the federal DHS CDM program by better securing your vital communications channels
- Protect against email fraud, malware, credential phishing and compliance risks
- Choose from the full Proofpoint portfolio of solutions, relevant to all phases of DHS CDM
- Discover if your CDM Request for Service is eligible for partial funding by CDM

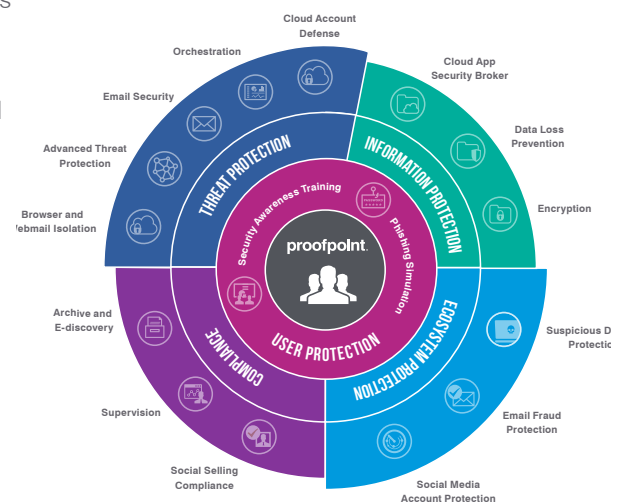

Proofpoint helps you meet each phase of the DHS CDM program by equipping you with the insight and visibility to better secure your vital communications channels. We protect your direct-to-citizen communications channels from email fraud, malware, credential phishing and compliance risks. We also give you visibility down to the application and user level. This helps you better prioritize alerts and responses.

LEVERAGE CDM TO PROTECT YOUR PEOPLE

With Proofpoint, you can leverage the Department of Homeland Security Continuous Diagnostics and Mitigation (DHS CDM) program to protect your people. Our solutions span all four phases of the program, providing you with asset, user, event and boundary protection, and data protection.

We support your CDM initiatives by helping you:

- Synchronize protection across security tools with API and forward/reverse proxy support
- Authenticate all legitimate senders and stop fraudulent emails before they reach employees or citizens
- Identify and protect sensitive and regulated data, whether “at rest” in file stores or “in motion” as it is sent or received
- Provide integrated detection and focused visibility on the threat type and intended targets of malicious communication
- Integrate behavioral data analytics and machine learning innovation for security orchestration and remediation of malicious content

ACCESS A FULL PORTFOLIO OF SECURITY SOLUTIONS

The full portfolio of Proofpoint solutions can be procured through the DHS CDM contract vehicle. What's more, your CDM Request for Service may be eligible for partial funding by CDM. Our solutions are authorized and available on the CDM Approved Products List, and they can be purchased directly from GSA IT-70. They're also highly regarded, with several having been named in the Gartner MQ. And most can be deployed as a FedRAMP cloud solution, virtually or on-premises.

ALL PROOFPOINT PRODUCTS ARE AUTHORIZED AND AVAILABLE ON THE DHS CDM APPROVED PRODUCTS LIST. THEY'RE RELEVANT TO ALL PHASES OF THE PROGRAM, AND THEY MAY BE ELIGIBLE FOR PARTIAL FUNDING BY CDM.

STAY AHEAD OF ATTACKERS

Proofpoint has a unique people-centric approach to cybersecurity. We empower you to address and protect your biggest risk—your people. We identify your most attacked people and then harden them against the panoply of attack vectors. At the same time, we manage things like data access, user behavior and delayed weaponization.

Whether you're looking to increase buying power, remediate known deficiencies, comply with federal directives or simply upgrade to a leading cybersecurity provider, we can help. Together, Proofpoint and CDM can lower your acquisition costs, increase efficacy and boost ROI.

Proofpoint solutions are designed to operate in heterogenous environments. They can also feed directly into CDM's Archer and other commonly used SIEMs.
